

OPPORTUNITY AVAILABLE

Full Stack Software Engineer & DevOps Specialist

Flexio / Warp Speed Solutions

Position Overview

Flexio / Warp Speed Solutions is seeking highly qualified candidates for advanced technical work encompassing software development, DevOps operations, and technical support. This multifaceted role offers the opportunity to work on cutting-edge projects including mobile applications, AI integrations, and logistics solutions from our San Patricio office.

Key Responsibilities

- **Software Development:** Design, develop, and maintain web and mobile applications using JavaScript and other programming languages
- **DevOps Operations:** Help maintain and manage AWS cloud deployments, implement CI/CD pipelines, and ensure system reliability
- **Technical Support:** Support existing operations team and provide technical expertise to resolve complex issues
- **Innovation & Growth:** Expand our technical capabilities and develop innovative solutions for clients

Required Qualifications

- Bilingual proficiency in Spanish and English (minimum A2 or B1 level)
- Software Development expertise; familiarity with JavaScript / multiple programming languages
- Broad understanding of web technology fundamentals (networking, web servers, etc)
- Experience with AWS cloud infrastructure and DevOps practices
- Self-sufficiency and independent problem-solving, strong communication skills

Ideal Candidate Profile

- 2+ years of professional JavaScript experience
- 5+ years of tech experience
- 1+ year of mobile application development experience
- 2+ years of DevOps experience with cloud infrastructure

Contract Terms

Employment Type: Flexible; either part-time or full-time engagement.

Probation Period: 90-day (3-month) probationary period to ensure mutual fit.

Contract Continuation: After the probationary period, option to extend / employment offer

Location: San Patricio office (expected to work primarily from office M-F), BYOD

Compensation: Based on experience and fit. \$50k-\$100k / year after probation period.

How to Apply

Interested candidates should submit the following materials:

- **Professional Portfolio:** Submit one or more of the following: resume, cover letter, GitHub profile, or portfolio / links to projects showcasing your projects and experience.
- **Video Introduction:** A short video (30s - 2mins) introducing yourself, explaining your background, and highlighting aspects you consider relevant. Video may be submitted in either English or Spanish.

Email us at hiring@warpspeedpr.com and a real person WILL respond / confirm we received your application!

We look forward to hearing from you!
